PROFESSIONAL SUMMARY

Founder and Business and Management graduate (BSc Hons, 2:1) who has built and runs a live, subscription-based AI careers platform on my own: an automated global job board, CV-matched job alerts three times a day, Stripe billing, AI assistants for members and 11 scheduled AI workflows. Before that I spent over four years in high-volume customer and operations roles at Southeastern Railway, Apple, Ipsos and Transport for London, including 80 to 100 claims a day and escalations across several teams. I turn manual processes into reliable automated ones, write clearly, keep accurate records and finish what I start. I am looking for AI, automation, implementation, customer success or operations roles in London (hybrid).

SKILLS

AI assistants and prompt design (Claude API) | Scheduled AI workflows and process automation (Claude Cowork) | Stripe subscription billing, Netlify Functions and Resend email | API integrations: Adzuna, Reed, Jooble, ZipRecruiter | Domains, DNS, hosting and business email | Customer onboarding, support and service recovery | Case handling, claims processing and escalations | Clear written communication to operators and customers | Accurate record keeping and process improvement | Market research interviewing | Data analysis and presentation building | Self-directed, works well remotely and independently

EXPERIENCE

FOUNDER AND DIRECTOR | Forever Careers and ForeverCalculated Resumes | December 2024 - Present

Hybrid, London

- Founded and run forevercalculatedcareers.com, a subscription job matching platform with a global job board of around 15,000 live roles across 19 countries, handling the rebrand, domain, DNS, hosting and business email myself.
- Rebuilt the business from a manual service, where I sourced roles and emailed clients by hand, into an automated platform that sources jobs, matches CVs and emails members with little daily input.
- Run the business day to day with 11 scheduled AI workflows covering client briefs, CV-matched job alerts, member follow-ups and social content drafts.
- Designed and launched two AI assistants on the Forever Careers website, with usage limits and crisis safety responses built in that point anyone at risk to Samaritans, NHS 111 or 999, plus a "How are you?" check-in on every page.
- Launched a 14 day free trial and monthly subscription through Stripe, a discounted student plan, and application Sprints (350 or 1,100 applications), which replaced the earlier done-for-you Agent service.
- Handle all customer support myself by live chat, email and social media, including account set-up, billing questions and service recovery for past clients.
- Launched ForeverCalculated Resumes (forevercalculatedresumes.com), a CV and resume builder, alongside paid CV services: one tailored CV for £49 or three for £99, each returned within 24 hours.
- Run multichannel marketing: Instagram, TikTok and LinkedIn content, an email and Instagram DM campaign that reached around 140 members and followers in one day, a free workshop outreach programme to colleges, councils and employment services, and printed flyers across North London.
- Scripted and produced a three-minute promotional video using real website footage, Descript's AI editor and three distinct AI voices, and added deep links to the site so any page or panel opens directly for demos and marketing.

OPERATIONS SPECIALIST | Apple | December 2025 - February 2026

London

- Managed overnight stock logistics and restocking (9pm to 5am) so the store was fully prepared before opening.
- Checked incoming deliveries in accurately, kept inventory records up to date, and supported customers with advice, purchases and after-sales queries on daytime shifts.
- Set up and reconfigured the shop floor ahead of product launches, making sure displays, demo devices and stock were ready for launch day.

SPECIALIST | Apple | July 2025 - December 2025

London

- Booked and managed Genius Bar appointments daily, assessing physical damage, software issues and hardware faults accurately.
- Delivered product storytelling on the shop floor and hosted live Apple Vision Pro demonstrations, explaining complex technology in an accessible way.
- Managed a high volume of customer interactions across sales, demonstrations and technical bookings at the same time.

MARKET RESEARCH INTERVIEWER | Ipsos | February 2025 - March 2025
Remote

- Conducted structured research interviews across the UK to strict quality and compliance standards, recording responses accurately and to deadline.
- Managed my own output targets independently while working remotely, building rapport quickly so people felt comfortable giving honest answers.

CUSTOMER SERVICE AND DELAY REPAY SPECIALIST | Southeastern Railway | June 2022 - December 2024
Remote

- Promoted into a dedicated Delay Repay role, processing 80 to 100 compensation claims a day against journey and delay records to consistent daily targets.
- Handled inbound customer calls, resolving queries about journeys, tickets, refunds and compensation clearly and in line with company policy.
- Managed escalations across the Refund, Assisted Travel and Complaints teams, and produced written communications to rail operators including Network Rail, Thameslink and Southern.
- Worked independently from home for two and a half years, balancing phone and written customer contact while keeping accuracy high.

CUSTOMER SERVICE REPRESENTATIVE | Transport for London | August 2021 - February 2022
London

- Processed a high volume of customer applications across multiple systems, focusing on accuracy and fast turnaround.
- Spotted delays and inefficiencies in processes and raised them with the team so they could be fixed.

OPERATIONS LEAD | Dutchie & Grill | February 2021 - August 2021
London

- Led kitchen operations and trained new colleagues, coordinating delivery orders across Uber Eats, Just Eat and Deliveroo at the same time.

BUSINESS ADMINISTRATION ASSISTANT | London Energy | November 2019 - January 2020
London

- Provided day-to-day administrative support, handled correspondence and kept records accurate, organised and up to date.

KEY PROJECTS

AI Assistants and Member Wellbeing | Claude API, Netlify Functions, Resend
Designed and launched two AI assistants on the Forever Careers website: Christal answers visitor questions and passes enquiries to me with the chat attached, and David is a members-only confidence coach. Built in usage limits and crisis safety responses that point anyone at risk to Samaritans, NHS 111 or 999, plus a "How are you?" check-in on every page.

Scheduled AI Workflows | Claude Cowork
Replaced manual daily work with 11 scheduled AI workflows, including a client brief that drafts replies for my approval, job match alerts, new member follow-ups, unfinished checkout reminders, a weekly business dashboard and the job board refresh.

Automated Global Job Board | Adzuna, Reed, Jooble and ZipRecruiter APIs, scheduled AI tasks
Built a job board pulling live roles from four job APIs, around 15,000 roles across 19 countries, that refreshes itself every three days, removes closed and duplicate listings, and weights new roles towards what members are most likely to land.

CV-Matched Job Alerts | Netlify, job APIs, email automation
Created a sign-up flow with mandatory CV upload that captures location, industry, working style and urgency, then emails members roles matched to their CV three times a day, each from a different company, with honest updates when nothing qualifies.

Subscription Billing System | Stripe, Resend, Netlify Functions
Set up a 14 day free trial with card at sign-up, automatic billing, retries on declined cards, and automated welcome, reminder and cancellation emails.

Tailored CV Service and House CV Template | Claude, HTML, PDF, Gmail
Designed the Forever Standard CV: a plain black and white, single column layout with clickable links, built so every CV is tailored to the role, uses only facts from the client's own CV, and never invents tools or experience. Produce each client's CV as a ready-to-upload PDF with a matching cover letter.

ForeverCalculated Resumes: CV and Resume Builder | Web build, Stripe, email delivery, HTML and PDF
Launched a second business, forevercalculatedresumes.com, in October 2026 to sell CV and resume services alongside Forever Careers. Set up the site, domain and payments, and priced the service simply: one tailored CV for £49 or three for £99, each returned within 24 hours.

AI Brand Team, Newsletter and Social Content | Claude, Claude Cowork, HTML, SVG
Created four illustrated AI characters in code as a consistent brand team, launched The Forever Times, a weekly jobs newsletter presented by Zuri where subscribers choose their countries, and set up a daily task that drafts social captions and slide images for my approval.

AI Promotional Video | Descript (AI speech and editing agent), HeyGen HyperFrames, Claude
Scripted a three-minute product video with three characters, captured real site screenshots through deep links, built scenes and timing with Descript's AI editor, and assigned a distinct AI voice to each character.

EDUCATION

BSC (HONS) BUSINESS AND MANAGEMENT | University of Kent | June 2024 | Grade: 2:1
LEVEL 3 BTEC EXTENDED DIPLOMA IN BUSINESS | Haringey Sixth Form College | May 2021 | Grade: Distinction* Distinction (D*D)
GCSES | Fortismere School | September 2018 | 5 GCSEs at grades 4 to 6, including English and Maths

CERTIFICATIONS

Google, September 2026
